

**ABSTRACT**

An improvement to a transceiver, such as a cell phone, a palm pilot, or equivalent telephone or computer display device, comprising a plurality of display devices, expanding supports, and a screen-size indicator. The expanding supports are connected to the transceiver, such as a cell phone, palm pilot or computer, and to the plurality of display devices. The expanding supports expands the plurality of display devices about the transceiver, such as a cell phone. The screen-size indicator is connected to the plurality of display devices. The screen-size indicator displays the video signal on the transceiver, such as a cell phone display, or the plurality of display devices, or the combination of the transceiver, such as a cell phone, palm pilot or computer, display and the plurality of display devices, as determined by the screen size, respectively.
